

SERVICES

Providing Integrated Solutions for Facilities and Plant Services

GreenWood offers maintenance and capital project expertise in the following areas:

Comprehensive Total Maintenance Service

GreenWood can become your maintenance department providing management, support staff, supervision and work execution responsibility. We establish state-of-the-art control systems, schedules, programs and procedures. We provide skilled mechanics and technicians who deliver top performance. The result is less net cost and greater flexibility than that of an in-house operation.

Supplemental Maintenance and Capital Projects Services

GreenWood can fill the gaps to take care of overflow maintenance work as well as small capital or expense projects. Customers typically find it more cost and schedule effective to keep a core of GreenWood personnel who can grow or shrink to fit changing requirements.

Production and Support Services

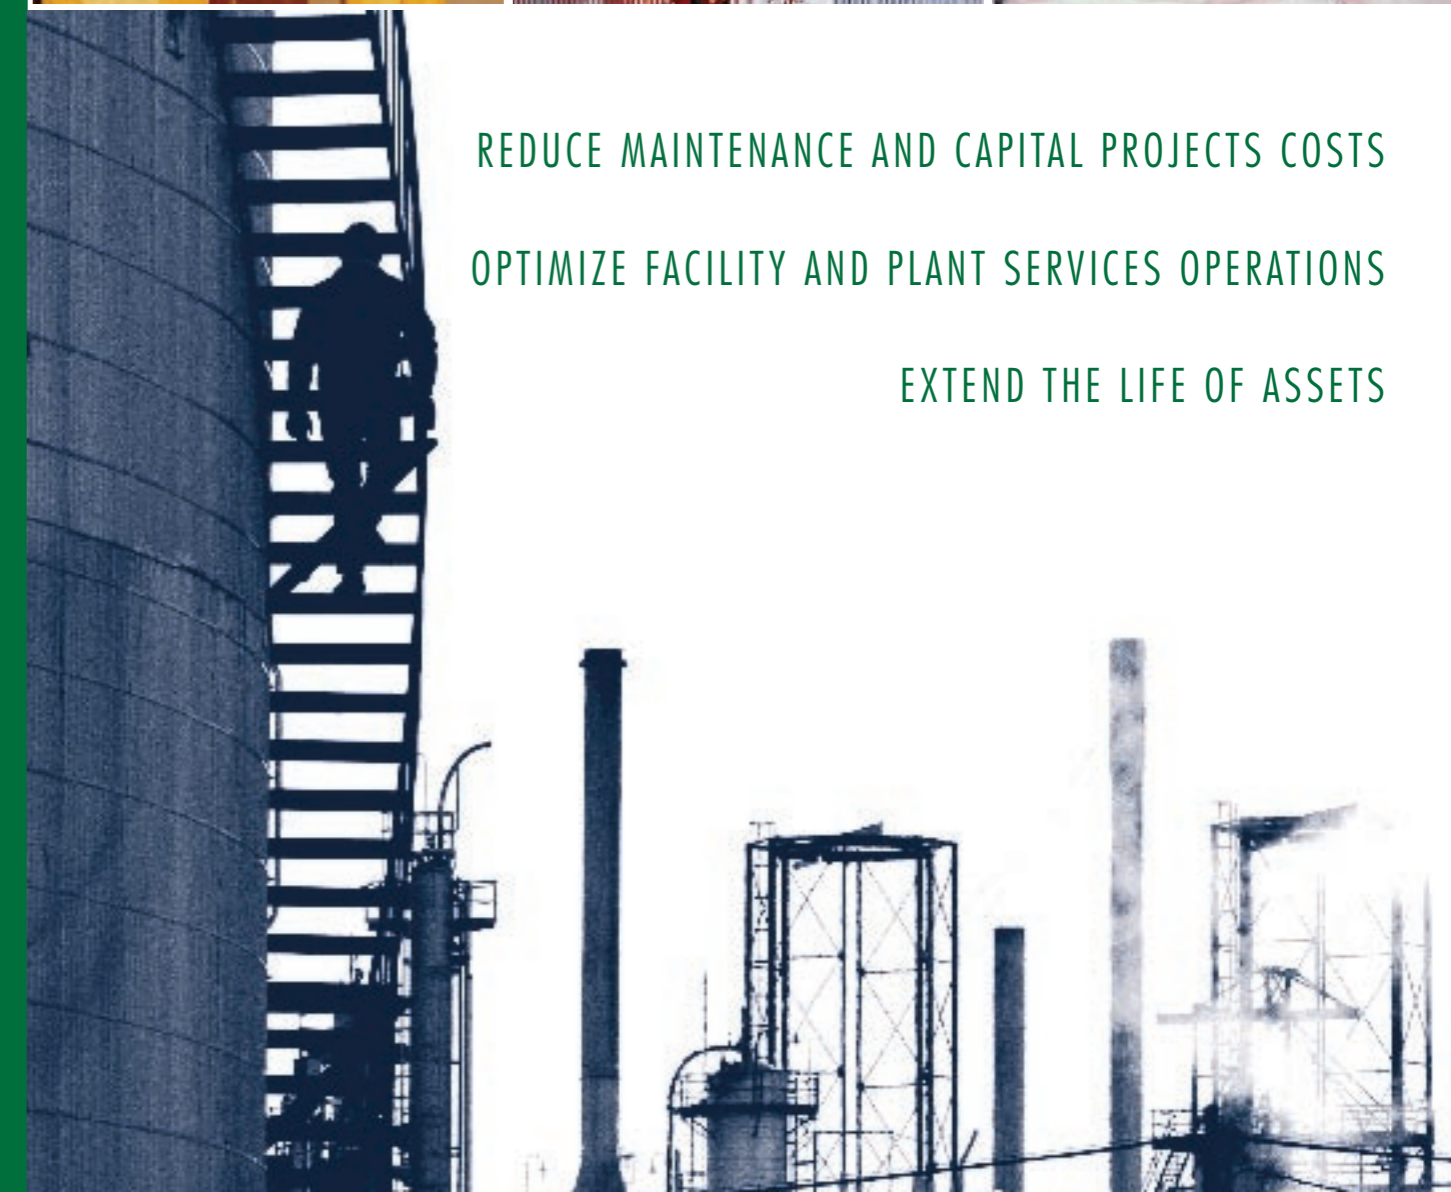

Combined with our continuous maintenance services, GreenWood can provide many ancillary functions at your site. These range from operations assistance, boiler/utility operations and IT technology to laboratory glass sterilization, mail room and courier services. Also, customers often want us to manage one or more of their specialty service contracts, such as janitorial, landscaping, roofing, and other services. We do this and more to take the load off the customer.

Capital Projects Services

GreenWood can maintain a work force at your site to accomplish the small to medium capital and/or expense projects typical in today's highly capitalized facilities. This can be combined with our maintenance services to furnish flexibility to your entire operation, and to allow projects to be quickly and economically put into service. Projects vary from equipment installation, relocation and retrofit to general construction and expansion. We have the skilled and professional management team, support staff and work force to provide this service.

CHALLENGES

The challenges placed upon facility engineering and maintenance managers continue to increase in difficulty. These challenges are all about reducing costs, increasing efficiency, improving productivity and optimizing operations.

SOLUTIONS

GreenWood's only business is to help customers meet challenges, gain efficiency, and improve their bottom line by providing tailored solutions for maintenance and capital projects.

- We work with clients to understand each unique requirement and goal.
- We provide customized solutions to fulfill our clients' needs and objectives.
- We partner with clients to provide skilled and experienced on-site professionals.

PARTNERS

GreenWood provides services to a broad spectrum of process, manufacturing, R&D and other facilities across the Southeast and Mid-Atlantic states. Relationships with our customers are based on a partnering approach focused on integrated solutions to their facility and plant services needs.

ADVANTAGES of GreenWood Services

1. Reduced costs through services tailored to specific customer needs.
2. Increased flexibility in problem solving and staffing options.
3. People and skills are available for quick response to needs and goals.
4. Frees up customers' own resources for other purposes.
5. Improved opportunity for customers to focus on and control their priorities and core business.
6. Customers can zero in on results, not on overcoming obstacles.
7. Customers gain access to resources and expertise not available internally.
8. Reduced customer long-term commitment for employee benefits, such as retirement, medical and other insurance, separation pay, etc.
9. Offers a "change agent" approach to accelerate re-engineering efforts.
10. Improved customer efficiency and bottom line.

- Biotechnology
- Petroleum Refining
- Automotive
- Synthetic Fibers
- Non-Wovens
- Plastic Films
- Turbine Engines
- Electronics
- Food and Beverage
- General Manufacturing

COMMITMENT

GreenWood's business is built on the foundation of strong business ethics and the philosophy of "Customer-Centered" management. This means an unwavering commitment to total customer trust and satisfaction, and maintaining unsurpassed performance in safety, quality, value and achieving customer goals.

Our COMMITMENT is customer-centered

- You are the focus and beneficiary of our dedicated time and efforts.
- Your interests are our interests. Your priorities are our priorities.
- We believe that if we focus and devote ourselves to making you successful, then ultimately we will be successful.

Our APPROACH is based upon the following customer-centered philosophy

- We do what we say we'll do—and more—on every phase of every service on every job.
- Superior safety performance is always a given—never an option or afterthought.
- We understand that all customer expenditures must create value.
- We support our customers in their efforts and goals.
- Flexibility and results are the primary drivers of our service.
- We listen to customers' needs and concerns.
- We stay close to our customers.
