## ■ FABRICATION SERVICES

Each regional office of GreenWood has a fabrication facility capable of executing the following disciplines:

- Piping – small and large bore process and utility piping utilizing mild steel, austenitic stainless, aluminum and nickel-based alloys. We provide fabrication and site work installation.
- Equipment skids – fabricate from your supplied drawings, equipment and all associated piping on a transportable skid for easy installation
- Structural steel – various supports, equipment bases, platforms, stairs, handrails, and ladders
- GreenWood has an “R” NBIC Certificate of Authorization to perform repairs and alterations to ASME boilers and pressure vessels and has been performing the same since 2003
- Hygenic welding service and orbital welding

GreenWood has Certified Welding Inspectors per the American Welding Society and provides the following services:

- Welder qualification testing
- Welding procedure qualification
- Visual and liquid penetrant testing
- Ultrasonic thickness testing
- Vessel inspections
